

# Caring for Your Jacuzzi with Chlorine

## Upon fill up:

1. Add 2oz of **Chlorine** directly to water
2. Pour one half (250 gallon spas or less) or one full bottle (250+ gallon spas) of **Metal Gon** directly into water
3. Add 2 oz. of **Renew** directly into water
4. Add 2 oz. of **Defender** directly into water
5. Wait at least 12 hours and check Ph with **Test Strip**
6. Adjust Ph as necessary with **Spa Up** or **Spa Down**

## After Each Use:

1. Add 1 tablespoons of **chlorine** directly to water

## Weekly Maintenance:

1. Check Ph with **Test Strip** and adjust as necessary
2. Add 2 oz. of **Defender** directly to water
3. Add 2 oz. (per 250 gallons) of **Renew** directly to water
4. Check **Chlorine Levels** with **test strip**

## As needed:

1. Add 2 oz. of **Bright & Clear** if water is cloudy
2. Add 2 oz. of **Enzyme** if spa develops a scum line around water
3. Add 2 oz. of **Foam Down** if water is excessively foamy

## Monthly:

1. Apply **Cover Care & Conditioner** to cover to protect from UV rays
2. Remove filters from the spa. Dilute one bottle of **Filter Clean** in four gallons of water and allow filters to soak for at least three hours. Rinse filters thoroughly and reinstall into spa.

## Every 3-4 months:

1. Drain spa and wipe down shell with a cotton towel. Once dry, apply a thin layer of **Fast Gloss** to the shell, allow 15 minutes to dry, and wipe off with a clean cotton towel.
2. Refill spa and refer to the Upon fill up portion above
